-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A new search conducted 1/14/05 provided data for a new ground of rejection.

See rejection below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 104 and 105 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chakmakjian et al (J. of Reproductive Medicine, 1987, 3(6), 443-8). Chakmakjian teaches the administration of micronized progesterone in tablet or capsule form to the vagina of women. See abstract. Chakmakjian does not teach the mixing of the micronized progesterone with water and diluents and/or excipients. It is obvious that a tablet would have comprised of more than the active (progesterone). Therefore, it is obvious to make tablets using water and diluents and excipients. With respect to the order of mixing, the order of obtaining a known product by witching around the mixing steps provides no patentable significance to the invention without the support of unexpected results. In the absence of unexpected results it is obvious that the progesterone tablet of the prior art invention could have Tmax equivalent to the Tmax of the instant invention.

Art Unit: 1616

Allowable Subject Matter

Claims 52-54,106-108 are allowable. The prior art does not teach or suggest an instant method of administering instant tablet comprising effervescent.
